To: Redeem The Generation

Addis Ababa

Subject: Giving Letter of Appreciation and Support

The Afar National Regional State is implementing Integrated Functional Adult Education /IFAE/ in the region starting from 2005 E.C. Due to various reasons, the region is not on the right truck in implementing adult education program. Our last achievements indicated that the program is not implementing as per the regional plan. To put specifically, our achievements in the years 2005-2007 E.C. are 23.1%, 28.9% and 32.5% respectively. We have evaluated the causes of low achievement and convinced to call support from various organization (like your good office) working on the area.

Based on our interest to work in collaboration with different organizations working in the area of adult education, we have made agreement to work with your good office. Starting from October 2014 to March 2016 Redeem The Generation (RTG) and 9 implementing partners have been working in 10 woredas of our region on "improving the livelihood of hard to reach women and girls through integrated functional adult literacy in sustainable manner". The regional state is very much pleased in the acheivments obtained. The project helped the region in improving the livelihood of pastoral community with primary focus on pastoralist women, capacity building and manpower training, etc... The approach by itself is effective as it brings improvement with the least possible time. The women have got economic support and started engagement in income generating activity.

We are pleased to express our great appreciation to your intervention in the last 18 months. Because of the intervention you made in the region, adults mainly women have got improvement in their livelihood. The support you made constituted 10.7% of the regional enrollment of adult education.

The regional state acknowledges your significant contribution in then area of adult education. We cordially express our commitment to work in collaboration with your good office.

With Best Regards,

Darasa Macammad
